---

### PROFESSIONAL SUMMARY

Cloud & Infrastructure Engineer with 3+ years of experience managing production-grade private cloud (OpenStack/KVM), Linux systems, and data center operations. Proven track record delivering 99.9% uptime across 200+ servers, automating 70–75% of manual tasks via Bash/Python/Ansible, and resolving L2/L3 incidents across infrastructure, OS, networking, and database layers. AWS Certified Solutions Architect and RHCSA-certified; experienced supporting large-scale enterprise environments (9,000+ servers) with full compliance adherence.

---

### PROFESSIONAL EXPERIENCE

**Cloud & Infrastructure Engineer** | **Leapswitch Networks Pvt Ltd** — Nashik, MH *Jan 2026 – Present*

- Manage and operate private cloud IaaS/PaaS infrastructure built on OpenStack with KVM virtualization, handling VM lifecycle management, cluster operations, and bare-metal provisioning.
- Resolve L2/L3 incidents across cloud, OS, networking, and database layers, minimizing downtime and improving platform reliability.
- Administer Linux servers (RHEL, Ubuntu, CentOS) with performance tuning, OS hardening, and proactive system troubleshooting.
- Configure and manage DNS, SSL/TLS, domain routing, firewalls, routing, and load balancing across production hosting environments (cPanel, Plesk, custom setups).
- Support customers via HostBill ticketing system, maintaining SLA adherence and contributing to the public knowledge base.
- Collaborate on CloudPe v2 development, enabling direct OpenStack cluster architecture for enhanced IaaS delivery.

**Associate Consultant – Linux Infrastructure** | **Sequiretek IT Solutions Ltd** — Mumbai, MH *Apr 2025 – Dec 2025*

- Delivered Linux patch management for Axis Bank across a 9,000+ server fleet using BigFix, maintaining 100% patch compliance and reducing security vulnerabilities by 85%.
- Managed daily system administration across Production and UAT environments, ensuring 99.8% system availability and seamless operations.
- Executed vulnerability management using automated scanning and remediation tools, identifying and resolving 500+ critical vulnerabilities monthly.
- Implemented OS hardening procedures following industry best practices; achieved zero security breaches during tenure.
- Ensured 100% compliance with organizational security policies; passed all quarterly RBI compliance reviews with zero findings.
- Developed Bash and Python automation scripts, reducing manual administrative overhead by 70% and improving operational throughput.

**Technical Associate – Linux & Cloud Operations** | **ESDS Software Solution Ltd** — Nashik, MH *Jan 2023 – Mar 2025*

- Administered Linux environments (RHEL, CentOS, Ubuntu, SUSE) across cloud and on-prem infrastructure, achieving 99.9% system uptime across 200+ production servers.

- Implemented LDAP integration and user access control systems, reducing security vulnerabilities by 65% for 1,000+ users.
- Managed package deployments via RPM, YUM, APT, and zypper — reducing deployment time by 40% and eliminating dependency conflicts.
- Developed 25+ automation scripts using Bash, Python, and Ansible, reducing manual tasks by 75% and saving 20+ hours per week.
- Optimized filesystems (ext4, XFS, Btrfs) and LVM configurations, improving disk I/O performance by 45% and reducing storage costs by 30%.
- Maintained zero-day vulnerability exposure below 24 hours and 100% compliance with security policies through continuous patch management.

## TECHNICAL SKILLS

---

**Cloud & Virtualization:** OpenStack, Private Cloud (IaaS/PaaS), KVM, Bare-Metal Provisioning, AWS (SAA-C03)

**Linux Administration:** RHEL, CentOS, Ubuntu, SUSE — Performance Tuning, OS Hardening, System Troubleshooting

**Networking & Security:** TCP/IP, DNS, Routing, Firewalls, NAT, VLANs, Load Balancing, SSL/TLS, Domain Routing

**Storage & Filesystems:** LVM, RAID, ext4, XFS, Btrfs, Block Storage, Filesystem Management

**Automation & Scripting:** Bash, Python, Ansible, Shell Scripting

**Operations & Reliability:** Incident Management, RCA, Production Support, SLA Management, Data Center Ops, Monitoring

**Security & Compliance:** Patch Management (BigFix), Vulnerability Management, Compliance Monitoring, LDAP, Access Control

**Tools & Platforms:** BigFix, HostBill, cPanel, Plesk, Docker, OpenStack CLI

## KEY PROJECTS

---

### Enterprise Linux Patch Compliance & Vulnerability Remediation Automation

- Built an automated patch compliance and vulnerability remediation workflow using Bash, Python, and Ansible across RHEL, Ubuntu, CentOS, and SUSE environments.
- Automated package inventory, missing patch detection, compliance reporting, and scheduled remediation; generated structured audit reports for operations teams.

### Automated Linux Hosting Stack Provisioning (DNS, SSL, Reverse Proxy)

- Engineered end-to-end Linux hosting automation provisioning Nginx/Apache, DNS configuration, SSL certificates (Let's Encrypt), and reverse proxy — cutting manual setup time by 70%.
- Standardized deployment workflows across cPanel, Plesk, and custom Linux environments; implemented health checks for DNS, SSL trust chain, and web service availability.

## CERTIFICATIONS

---

- AWS Certified Solutions Architect – Associate (ID: CHB3HPK7MVQ1CCR) — Sep 2024
- Red Hat Certified System Administrator – RHCSA (Credential ID: 220-066-799) — Apr 2022
- Docker Foundations Professional Certificate — Mar 2025

## EDUCATION

---

### Master of Computer Applications (MCA)

Aug 2023 – Jun 2025

Savitribai Phule Pune University, Nashik — CGPA: 7.65/10

### Bachelor of Business Administration – Computer Application (BBA-CA)

2020 – 2023

Savitribai Phule Pune University, Nashik — CGPA: 8.89/10
